A robust, manly

A robust, manly son and a cooing baby-girl nestling inher bosom — what more can any womanly woman ask? It is a boon that Heaven intended should be granted to every woman.

Thousands fail of this because they have seglected to look after their health in a womanly way. The health of a woman's babies is dependent upon her own health during the period of prospective maternity. The prospective mother cannot be too particular about her physical condition. If she suffers from local weakness, nervousness or loss of vigor and virility, her children will be weak, puny and sickly. Dr. Pierce's Favorite Prescription is the only unfailing cure for all weakness and disease of the delicate and important organs that bear the brunt of maternity. It makes these organs strong, healthy, vigorous, virile and elastic. It makes the prospective mother strong and cheerful. It robs maternity of its perils. It insures a baby constitutionally strong. It is the invention of an eminent and skillful specialist, who has had thirty years' training in this particular branch, during which time he and his staff of physicity have prescribed for many thousands it women. Medicines dealers sell it and an honest dealer will not urge upon you an inferior substitute merely for the little added profit he may make thereon.

"I am the mother of a nice baby four and a half months old," writes Mrs. J. B. Clongh, (Box 203.) of Lisboo." Grafton Co., N. I. "I cannot give too muc praise to Dr. Pierce's Favorite Prescription."

ONE SHOT MEANT WAR

BUT THE GERMANS WISELY REFRAIN-ED FROM FIRING IT.

The Yankee Commander Leary Was Ready For the Fray and Proved Too Plucky and Tactful For His Opponent-A Story of Samoa.

The pluck and grit of American naval officers are aptly illustrated in an article by Henry Collins Welsh in most efforts, completely failed to over-Ainslee's Magazine, in which the writer tells how Commander Leary brought the German naval force in Samon to terms some years ago. He says:

It was at the outbreak of civil strife that Captain Leary arrived at Apia in

On the day previous a message came from Mataafa to inform Commander Leary that the Germans had threatened to attack Mataafa in his stronghold on the morrow. Both Mataafa and Tamasese had intrenched themselves in fortified places about seven miles from Apia upon land under American protection. Matanfa asked for advice, and Commander Leary told him through the messenger to stand his ground, that he would not allow the German to make an attack upon property under his protection.

smoke that would have warned the Germans of his action. Then he muffied his anchor chains with native mats, and at 4 in the morning all hands were quietly called to quarters. At daybreak the anchors of the Adler were hauled up and with full steam on the vessel made for the open sea. Noiselessly came up the Yankee's anchors, and to the amazement of the Adler the Adams was close upon her heels. The German had to turn to get out of the harbor, and by the time she reached the entrance the two ships were close together. Again the German turned and then headed toward the fort that was to be bombarded. Commander Leary ran his ship between the German and the shore and when about 300 yards from the Ad-

ler gave the order: "Clear for action!" At once the decks were cleared, and the guns were trained. The German followed suit, and the two ships steamed along the coast ready for the

Then Commander Leary sent this note

At length the German started on a cruise along the coast, but he could not shake off the persistent Yankee. Finally he renounced his designs and returned to his anchorage in Apia bay: To her anchorage came also the Adams, and Commander Leary had won the game.

Be Natural.

One of the surest ways to be awkward "in company" is to try to act differently from one's accustomed manner. If one's everyday manner is not good enough for company, then it should be changed, but the most delightful company manner is the natural manner when it is natural to be charming. One of the charms of an agreeable manner is to seem to be unaffected. Another is to listen appreclatively when others speak.-The Gen-

Dr. Kinappe was then the German consulated at Apia, and he and Commander at Apia and he and Commander at Apia and the American light between the German so on one hand and the American and English on the other. The Germans bombarded villages on various prevents, fired upon unarrued rantives and gave open aid to Tamasses.

Captain Leary at that time was a commander, and it was not long before he and Captain Fritze had some lively interchanges of compliments.

THE S ALE F IR

The State For has closed and its doings will be chronicled in State Fair bistory, if there is anything connected with it worth relating. The Satele fairs are not what they should be in a State Sich as is Nevada. A State possessed of soils whose superior, is not on the earth, and whose climate is such that it aids the soils to do their work it the best development of vegetable p od acts. Tuere is no artificial scian ulas in the soils or in the climate. The was e wo k of provide to maintity is in absolute absord with nature's laws. Operating on lines provided by nature, unsided brough the ingenury of man, and the very best results of nature's work are given when maturity is reached.

The efforts of the farmer are summed up in plowing the ground, sowing the su tear nd bus gonagiri on lachees the erep. No such tesulisher been had from any part of the early is anotent or or size of titues, except to the Villag of Jo die, where a record of like re-ul a was male about two thou-Sand years ago.

It is not because the farmers are so busy that they do not have the time to prepare and bring exhibits that they do not appear at the firs, as there are no agriculturi-ts on the earth wo have more lessure time to dispose of than the farmers in Navala. I is not because the Nevada firmer is "an shi less," as is said by a character in "Uncle Lom's Cabin," that he will not go to the trouble to bring exhibite of ha projucts.

The Nevals faimer is a man of ele Ky when it is required in his work, and he is proud as he should be over the results of his labor and the west h of his land, and he takes a just praisin exhibiting them to the world, so he of mell do, the e care no ones for h m to blush over the products of his form, and in truth they in declin king over the farm produces of the temperato Zones. As the larmer is not to blame because there are no exhibits or form products, the consector that absence must be in the management, and the e is where the danse exists.

No povision was made for exhibit of farm products. The oals provided. made was for speed track events-to be plain, borse racing-which is alvery well as a part of the exhibition. as State fair exhibt slate made on the court, but when all that enters into the red in erest of the State in provilling for S are excitibite, is disregarded to provide the means necessary to make purses for racing, the real orject of the State is lost east of and the propie have a right to complain.

The writer is a director, and he is o the opinion that if the present manszement will not do heiter wolk the very best thing it can do, to the interest of progress, is to resign. The people of Reno were liberal in their contributions to aid to making the fair wast it should be to Beno said to the Sate, and they have a right to require that something be done in the real interests of both town and State, The management are under obligations to Colon-l Muzen and John Sparkfor exhibits of Shurthorns and Hereford-. These out to were explined at the Oilformia State fair at Sicremento and Carried away everything to the proze line, not leaving for C diforms exhib. tore a blue or punk ribbon.

With these end many other facts before our people that confirm the superior quality of our form products It will be strange, if proper opportingity is given, if they do not exhibit O berex imples of scock exhibited were good, but no each exhibit of strak was made as Nevada te capuble of miking.

Bogs That Have Eluded Their Owners and Even Cuts and Birds That Have Gone Astray, Rave to Be Cared For In the "Morgue,"

"Have you seen anything of a beautiful little girl with flutty golden hair and a blue frock?" anxiously inquired a young woman of the clerk in charge of the linen counter in a great department store.

"Why, no! Are you sure you brought her in here?"

"Indeed I am! I left her sitting before those 98 cent damasks to look at those \$1.43 shirt waists marked down

"Don't be alarmed," remarked the clerk, consolingly. "She'll turn up all right I expect she's up in the dead room by this time." "The what?"

"The dead room-the morgue, you know'

"The morgue? Ob, my Irene! Ob, my dailing"

"Sh-h h madam," softly commanded a floor walker, for a commetten seemed imminent. "Your child is safe enough, I'll venture. The 'morgue' is simply the cant name of our lost and found department. Come with me, and we will see if the little girl is there"

The young woman followed to a long But the seance was over and she room the door of which was labeled "Lost and Found," and there, sure enough seated upon a monument of packages, boxes, baskets, umbic 13 canes and other articles, sat it golden haligelign) in a blue froe tentedly kilking her small feet 2

'I don't know if there is any portable article animate or inanimate, which does not find its way to the morgne," confinued the keeper reflect-'No class of people loses things so readily us shoppers do. You see, they become so interested in looking at bargains that they lay down whatever they may happen to have in their hands and perambulate between counters with hardly a thought as to

They go fly ng about from one counter to the other, prosecuting their inquiries without stopping to think whether they have visited those same counters before or not Therefore the morgue has becon a valuable and indispensable department in every large store.
